FRUIT TREES AND ORNAMENTALS

FAIRBURY NURSERIES

C.M.HURLBURT & SON, PROPRIETORS, FAIRBURY, NEBRASKA

Evergreen Group

OUR LATEST PRICE LIST

We are presenting you with our new catalog for 1925 which describes our general assortment of high grade, hardy fruit and shade trees, small fruits, ornamental shrubs and vines. We have been in the nursery business for forty-three consecutive years, thoroughly understand all the details and conduct our business on the basis of "a square deal to all." In addition to the growing of young trees and plants, we have orchards and vineyards and grow an abundance of fruit, such as Cherries, Plums, Peaches, Grapes, Pears, Strawberries, etc.

You can raise fruit, too, for it has been proven that good fruit and plenty of it can be grown in any locality where other crops are grown and with very little time and labor.

Convince yourself of the truth of this by buying some of our young, healthy stock this spring and grow your own fruit. It will pay you and it will add beauty and value to your home. We have carefully prepared this catalog for you, giving descriptions of the best varieties so you can easily make your selection. Every plant, vine or tree you select represents the result of our long years of experience in the nursery business. You are sure to be pleased.

WHAT WE DO

We cultivate our trees in the most thorough manner and dig with the best improved tree digger, thus getting good length of roots.

We guarantee all trees, vines and plants to be in good, healthy and growing condition when they leave our packing rooms.

In packing we use paper lined boxes or bales, using plenty of wet moss and straw, thus preventing our stock from becoming dry in transit; we make no charge for bales or boxes.

While we take the best care, in filling orders with stock true to name, should a mistake occur we will be responsible only for the original cost of the stock.

We usually commence shipping in the fall, October 15th, and in the spring, about March 10th. We can, however, ship a greater portion of our stock any time during the winter from our frost-proof cellars; by this plan we can accommodate our customers who live in the South.

Fall Apples

WEALTHY—A variety highly valued for its extreme hardiness at the far North. Tree is a thrifty grower and a good bearer. Fruit medium, roundish, skin is smooth, mostly covered with dark red, flesh white, fine grained, juicy, sub-acid, good quality. Will keep until January. Extra good sort and splendid dessert and cooking apple. This is one of the few most desirable varieties for Minnesota, Wisconsin, Iowa and Nebraska, as well as the eastern and middle states.

MAIDEN BLUSH—Good size, fine flavor, beautifully blushed, good bearer, a fine apple for home and market. September.

RAMBO—One of the best fall eating apples, green striped with red. September.

Winter Apples

WINESAP—Too well known to require a description. Tree hardy almost wherever planted, early bearer and profitable; tree inclined to overbear, causing fruit to be undersized. Color red, sometimes almost black; flesh almost yellow, firm and crisp; one of the best. November to May.

MISSOURI PIPPIN—Tree resembles a seedling, good grower, foliage dense, fruit early, very productive; fruit medium, surface smooth, shaded, mixed striped red; flavor sub-acid, very good; December-March.

DELICIOUS—Fruit is large, with the surface almost covered with a most beautiful brilliant dark red, blending to golden yellow at the blossom end. In quality it is unsurpassed, in flavor it is sweet, slightly touched with acid, but only enough so as to make it all the more pleasing, with an aroma delightfully fragrant. The flesh is fine grained, crisp, juicy, melting and withal delicious. In keeping quality it ranks with the best, coming out of storage in March and April in perfect condition. Tree is very hardy. Delicious originated twenty years ago at Peru, Madison County, Iowa, by the late Jesse Hiatt, and on his farm the original tree still flourishes, bearing annual crops of beautiful fruit.

BEN DAVIS (New York Pippin)—Fruit medium to large, round, skin yellowish, splashed and striped and almost covered with red, flesh white, tender, moderately juicy, sub-acid; an excellent variety; tree very hardy, a free grower, coming into bearing early and very productive; it blooms late in the spring, thereby often escaping late frosts; very popular in the West and Southwest. December to March.

Wealthy

BANANA—Fine, vigorous grower, large, healthy foliage; early bearer. Fruit medium to large, smooth and handsome, golden-yellow, usually shaded with red blush; flesh fine grained, rich, sub-acid, aromatic; highest quality. One of the best dessert apples. A valuable market variety in some sections. Originated in Indiana.

JONATHAN—Beautiful tree, good grower, fruit full medium, fair producer, color dark shaded to almost black in the sun, fruit drops in dry season. November and December, but can be kept until April.

McINTOSH RED—Origin, Ontario. Season, December and January. A choice variety of the Fameuse type. Tree vigorous with spreading head; a good annual bearer. Fruit above medium to large, highly perfumed; smooth polished yellow, almost covered with brilliant solid crimson, a beautiful fruit; flesh snow white, crisp, very tender, sprightly aromatic, sub-acid; very good quality.

GANO—The fruit is bright red on yellow ground (no stripes); large; oblong, tapering to the eye; surface smooth, polished; dots minute; basin shallow, sometimes deep; eye large, cavity deep, brown in color; stem medium to long; core medium. Season, January to April. Tree healthy, vigorous, hardy; an early annual and prolific bearer.

MAMMOTH BLACK TWIG—One of the best for the Middle West. Fruit large, dark red, firm sub-acid and juicy. Keeps as long as any apple in a common cellar; tree a strong grower; resembles Winesap, but is superior in many ways and fully one-third larger. January to April.

GRIMES GOLDEN—Tree upright and hardy, fruit full, color golden yellow when ripe, medium to large, quality sub-acid, mild and melting; valuable in any orchard.

Choice Varieties of Apples

We have two varieties of apple to which we call especial attention as they should be in every orchard.

GOLDEN WINESAP—This is a fine variety introduced by the Fruit Grower of St. Joseph, Missouri, and originated in Utah. Many specimens from the original tree were from 4 to 4½ inches in diameter. The tree is a fine, healthy grower and the apples are good keepers. Golden yellow with a deep red blush. It has been unanimously recommended and you will make no mistake if you plant a few Golden Winesaps this year.

YELLOW DELICIOUS—Tree as hardy as Jonathan and a robust grower. We have trees one year from the bud over six feet high. Prolific, and bears early; fruit somewhat larger than Grimes Golden, more sprightly in flavor and a better keeper. The tree and fruit resembles Stark's Golden Delicious, which is a variety we cannot sell or catalog because the name has been copyrighted and registered. You will make no mistake in planting Yellow Delicious in your orchard.

Yellow Delicious

DWARF APPLES

These are budded on a variety of wild apple tree which is grown in France. The young trees are brought to this country and budded, which dwarfs them the same as a Dwarf Pear. They are perfectly hardy here and begin to bear when two years old, and can be planted 10 feet apart. They make a fine tree for planting on town lots where little room can be had for an orchard. We only catalog two varieties which we consider best, the Jonathan and Wealthy.

PRICES OF DWARF APPLE BY FREIGHT OR EXPRESS

3 to 4 feet.....	.85	8.00

CRAB APPLES

The improvements in the varieties of Crab Apples have kept pace with the other kinds of fruit. A few years ago it was only thought fit for cider, jelly and preserves, but there are varieties now that command good prices in the market for dessert purposes; especially is this true of the Whitney. Besides being useful they are very ornamental when in bloom and when burdened with their load of highly colored fruit.

WHITNEY No. 20—A large crab, 1½ to 2 inches in diameter. Skin smooth, glossy green, striped with red. Flesh firm, juicy

and flavor very pleasant. A fair dessert apple and one of the best for cider and vinegar. Tree a great bearer and very hardy. Really deserves a place in our apple list. There are few early varieties of so much merit. One of the best for northern states. Ripens in August.

TRANSCENDENT—Fruit medium, brownish red and handsome. Excellent for jelly and preserves. Good grower and immense bearer. September.

GOLDEN BEAUTY — Very large and handsome; fine amber or golden yellow.

HYSLOP—Seasons, September and October. Fruit large, very brilliant color, dark red or purplish, overspread with thick blue bloom; borne in clusters. The tree is a good grower, very hardy and a reliable cropper, yielding good crops annually. It is desirable for both home use and for market.

DOLGA or IMPROVED RED SIBERIAN—A Russian variety of rare beauty and peculiar lemon acid flavor, entirely different from any other crab. It is exceptionally hardy and productive and free from blight. Superior to any other crab for jelly. When filled with the large dark red fruit the tree appears from a distance to be covered with dark red flowers.

Pears

PEARs being upright growers, may be planted twenty feet apart each way. They should be trained to branch as near the ground as possible. The first four years' planting, the top leaders should be cut out and thus compel them to form a bushy top. Dwarf pears come into bearing four years after transplanting and standards not until the eighth year.

BARTLETT—Large size with often a beautiful blush to the sun; buttery, very juicy and highly flavored; bears early and abundantly; very popular. August.

CLAPP'S FAVORITE (Fay)—Large; pale lemon yellow with red cheek; flesh of fine texture, melting, buttery, juicy, with a rich, vinous flavor; good for market and kitchen. Tree hardy and very productive, does well in all sections. Standard or dwarf. August.

DUCHESS d'ANGOULEME—Very large, dull greenish yellow streaked and spotted with russet, flesh white, buttery and very juicy, with rich and very excellent flavor, on the quince, to which stock this variety seems well adapted; it is always fine, the large and fine appearance of the fruit makes it a great favorite. September and October.

SECKEL—Small, skin rich yellowish brown when ripe, with a dull brownish red cheek, flesh very fine grained, sweet, is exceedingly juicy, melting, buttery, the richest, highest flavored pear known. August and September.

Bartlett

FLEMISH BEAUTY—Is a large, beautiful, juicy, melting, rich and fine, good bearer, is hardy everywhere. August and September.

KIEFFER'S HYBRID—The pear was raised from seed from Chinese Sand Pear accidentally crossed with the Bartlett or some other kind grown near it. Tree has large, dark green, glossy leaves and is of itself

very ornamental; is an early and very prolific bearer; the fruit is of good quality, wonderfully showy and is valuable for the table and market; it never rots at the core, and is as nearly blight proof as it is possible for any pear to be. September and October.

Price of Kieffer Pear 5 cents less than all other varieties.

DWARF PEARS

In the Dwarf Pears we have the following varieties: Bartlett, Duchess and Seckel.

Plums

THE plum does best on a rich, well drained soil. The trees should be planted 16 feet apart, and it is well to plant several varieties together, for they seem to produce larger crops in that way than where a single variety is planted alone. Prune them so they will be low headed, and thus protect the fruit from the wind storms which sometimes play sad havoc with the fruit when commencing to ripen.

GERMAN PRUNE—A large, long, oval variety much esteemed for drying. Color dark purple, of very agreeable flavor. September.

Burbank

German Prune

BURBANK—The best of all the Japan sorts of plums, nearly globular, clear cherry red, and with a thin lilac bloom. The flesh is deep yellow color, very sweet with a peculiar and very agreeable flavor, free, vigorous with strong, upright shoots, large, broad leaves; commences to bear usually at two years. It blooms late and consequently more liable to escape the late spring frosts.

LOMBARD—Medium, round, oval, violet red, juicy, pleasant and good, adheres to the stone, productive. A valuable market variety, one of the most hardy and popular. Last of August.

OMAHA—Fruit very large; dark rich red. Flesh is meaty and delicious. It is perfectly hardy and bears annual crops of large fine plums in August.

PROF. HANSEN'S NEW HYBRID PLUMS

SAPA—Very fine, perfectly hardy, new plum. Professor Hansen's description: "The female parent is one of our selected seedlings of the Western Sand Cherry (*Prunus Besseyi*), a favorite fruit of the Sioux Indians. The male parent, a large, purple flesh Japanese plum originated by Luther Burbank, and by him named the Sultan. Sultan is of the Satsuma type and is perhaps a cross with some other species. The Sapa fruited first in 1907 on a tree cut back very severely for bud sticks. The tree is plum-like in habit; one-year trees in nursery have many fruit buds; the glossy, dark purple skin, and the rich dark purple red flesh of its Japanese sire. Sapa is Sioux Indian for black. 'As dark as the shades of evening ranked in the western heaven.' Turning the branches of this tree back and exposing the long ropes of glossy black fruit to the rays of the sun, the back-ground of brown, smooth bark and the glossy, dark green foliage, is certainly a pleasant sight and one to be remembered. The fruit is eatable and hangs on the tree for more than three weeks. When it first commences to mature, the skin is dark green and the flesh of the royal purple. The color of the skin and the flesh gradually changes until it is as black as the darkest midnight. The skin of this variety is especially tender and practically disappears with ordinary canning. This plum makes excellent preserves and jelly and is of the finest quality for eating fresh from the tree.

This **OPATA** plum is a cross of the Dakota Sand Cherry and the Gold Plum, a large Hybrid Japanese variety, originated by Luther Burbank and for which \$3,000 was paid when first introduced. The Opata is vigorous in growth, heading very low and of quite spreading habits. It forms fruit buds freely on one-year-old shoot in nursery and bears without exception the next year. The color of the flesh is green, flavor very pleasant, combining the spicy acids of the Sand Cherry with the rich sweetness of the Gold Plum. The plums of this type are the earliest of any to mature.

WANETA—This wonderful big new plum is the latest of Professor Hansen's productions, and gives the northern orchardist his first opportunity to compete with California in growing large market plums. The following is Professor Hansen's description: "My belief is that in this variety I have

combined the best points of the native and Japanese Plum. It is the largest of 10,000 seedlings. In size it is two inches in diameter and weighs two ounces. The female parent is the apple plum, a large Japanese variety. The male parent is the Terry, the largest of the native varieties. We regard this as the most promising plum that has been offered to our planters since the settlement of the country. All the reports coming in from those who have tried it describe the Waneta as bearing early and producing the largest fruit that has been raised in their locality."

HANSKA—(Sioux Indian for Tall), and refers to the extraordinary growth and symmetrical shape of the Hanska plum. The Hanska does not come into bearing as early as those varieties containing Sand Cherry blood, but three and four-year-old trees in the nursery were loaded with most excellent fruit. The Hanska was produced by crossing a wild Northwestern plum with the very large, firm fleshed fragrant apricot plum of China—*Prunus Simoni*—which is so very popular in all of the orchards of California. This variety has all of the good qualities a plum should have. The Hanska is a very large plum, a great many specimens measuring better than 1½ inches in diameter. Is of the best quality for eating from the tree, for canning, preserving, or making jelly. None of the California or native American plums compare with it in any way. In color it is a bright red with heavy blue bloom. In shape it resembles its male parent, the Apricot plum.

Cherries

A GREAT deal of attention is now given to the growth of Cherries in the West, and no well planted home orchard is complete without its proportion of cherry trees, and it is one of the most prolific of garden fruits. It will succeed in any kind of soil that is not wet. It may be planted near the street, or used to line avenues as an ornament, and it will at the same time produce an abundance of delicious fruit. This may be eaten out of the hand, preserved, or it will find a ready market at highly profitable prices, for shipping, canning, etc.

Our cherry trees are budded on Mahaleb cherry stocks, which do not sprout from the roots. Care must be taken in planting that the trees are not planted too deep; one inch deeper than were budded is deep enough; should they be planted deeper than this the tree will be liable to throw out roots above where budded, and these roots, if broken, will throw up sprouts or suckers.

Plant trees twenty feet apart, keep the main leaders headed back the first two or three years after transplanting. By so doing you will have fine bushy tops near the ground, which will be of great advantage in picking the fruit.

Montmorency

SOUR VARIETIES

4 to 5 feet.....	.90	8.50

LARGE MONTMORENCY—The best of Montmorency family and equaled in value only by Early Richmond. The Montmorency has all the good quality of the Early Richmond, but ripens two weeks later. The fruit is identical with the Early Richmond. Some firms have put the Large Montmorency out under different names, but there is only one Large Montmorency and we have the true strain.

EARLY RICHMOND—The oldest and most reliable cherry tree grown today. It has proven its excellence for generations for home and local consumption. There is nothing to take its place. Light red in color. Very juicy and acid flavor. It ripens about the first of June. It bears very heavy and will produce a crop oftener than any other variety known. When in doubt plant the Early Richmond, as it does best in all climates or on any soil.

ENGLISH MORELLO—Fruit large, very dark red, nearly black; tender, juicy, acid, rich, of good quality. Owing to its rich, red color, looks much better when canned than Early Richmond. Tree dwarf, slender and spreading, bears young. I would not advise planting this variety farther north than the middle of Nebraska. Ripens July.

BING—Very large, dark brown, almost black, flesh firm, sweet, rich and delicious. On the Pacific coast, where this variety originated, it is considered one of the most profitable sorts.

LAMBERT—This very promising cherry is of the largest size, bright, rich, dark purplish-red color, turning almost jet black when ripe. Surface smooth, glossy, covered with minute russet dots. Flesh reddish with white veins; very firm, of unsurpassed quality. Stands well in the lead as a shipping variety; tree healthy, rugged, strong grower, immense bearer. Ripens 10 days later than Napoleon Bigarreau.

Napoleon Bigarreau

NAPOLEON BIGARREAU—(Royal Ann). Magnificent cherry of largest size; pale yellow, amber in the shade, richly dotted deep red. Very firm, juicy and sweet. Rapid grower and immense bearer. Most popular for canning, preserving and shipping. Is hardiest and best yellow sweet sort. Immense market for the fresh fruit at top prices. Ripens end of June.

ZUMBRA CHERRY

ZUMBRA CHERRY—Originated in Minnesota, is a cross of the Pin Cherry, the large Sweet Cherry of the west coast and the wild Sand Cherry of the Dakotas. It seems to be

Zumbra

a happy combination as Zumbra is as hardy as the Sand Cherry, grows like the Pin Cherry and the fruit is as large and as good quality as the California Sweet Cherry. Comes into bearing the next year after planting, very prolific, maturing large annual crops. Zumbra is placed on the Minnesota recommended fruit list as "leading variety." It ripens after the sour varieties are gone.

THE COMPASS CHERRY PLUM

The Compass Cherry-Plum originated with H. Knudson of Springfield, Minnesota, and is believed to be a cross between the Western Sand Cherry and the Miner Plum. Its habit of growth is like the Miner, while the leaf, twig and bark very much resemble the Sand Cherry. It is a strong grower, and makes a very fine orchard tree. Fruit about an inch in diameter, and is as much a plum as it is a cherry. The shape is oblong and slightly flattened. The pit is between the ordinary American plum and Early Richmond pit in shape and size. It has a flavor peculiar to itself, very palatable and rich. An immense and early bearer. Tree perfectly hardy as far north as Manitoba.

QUINCE

✓ Owing to the negligence of the cultivator, this valuable fruit is seldom seen in perfection, being mostly allowed to grow without the least attention or cultivation. The Quince requires good, deep soil, which should be clean and mellow, with an occasional dressing of manure and a sprinkling of salt; but does not need severe pruning like many other varieties of fruit; a careful thinning out of the old decayed wood will be sufficient. Keep a vigilant search for the borer.

CHAMPION—Noticeable for its early bearing and superb appearance. Very large, mostly oval; deep yellow; excellent quality. Tree very prolific and vigorous. A good keeper.

APPLE OR ORANGE—This popular old Quince is one of the most reliable varieties for market. Large to very large, roundish, with short neck; golden flesh; firm and of fine flavor. October.

Rocky Mountain Cherry

Budded Peaches

THE peach tree requires a moderately rich, well drained soil, and in order to preserve the continued healthy growth of the tree and thus cause it to produce well matured fruit, its branches should be headed in each year.

Peach trees when planted alone should be set twenty feet apart, or they may be planted between apple trees. Plant them deep enough so that the crook in tree where they were budded is covered over with earth.

In Nebraska we cannot expect a full crop of peaches each year, owing to our cold winters, which kill the bloom buds; but if you can only get a full crop once in three years they will pay you better than any other crop that can be raised in Nebraska, cherries and strawberries excepted.

Below we give a short description of those varieties which we consider among the best, the greater number of which we have fruited in our own grounds.

SALWAY (Free)—Large, roundish, deep yellow with rich red cheek; flesh yellow, firm and juicy, and sugary; a late market sort.

CHAMPION—Many specimens have measured 10 inches in circumference. The flavor is delicious, rich, sweet and juicy; surpasses all other varieties; skin creamy white with red cheek, strikingly handsome. It is hardy, productive, the largest size, highest flavor and best shipper of the early peaches. Ripens in early August.

ELBERTA—A Georgia cross between Crawford and Chinese Cling; very large, well colored; all things considered, the finest yellow freestone in cultivation; no one can go amiss by planting it; fruit perfectly free from rot, and one of the most successful shipping varieties. August 20.

RED BIRD—A fine early peach; bright glowing red. A good shipper. Flesh juicy, firm and most delicious peach flavor imaginable. Tree hardy and vigorous.

MAYFLOWER — Earliest peach known, semi-cling, medium size, color bright red; ripens well to the seed. Young and prolific bearer. Tree an upright good grower.

J. H. HALE—Yellow. Very large in size, and globular in shape. Skin is thick, smooth and without fuzz. Flesh deep yellow, fine grain, firm, excellent quality. Good shipper. Ripens immediately after Elberta.

APRICOTS

A MOST delicious fruit of the plum species. It is a distinct flavor and one of our best and most profitable market fruits. The tree bears very young and most profusely. Ripening as it does between the cherries and peaches, the apricot is a most welcome fruit. In very sunny localities it is apt to bloom too early in the spring and get caught by the frost. The tree is slender in form, has beautiful dark foliage, pretty pink blossoms, and will give very satisfactory results as an ornamental tree in any garden or house lot.

ROYAL—Large; yellow with orange cheek; juicy; rich and delicious; a fine variety. Last of July.

MOORPARK—One of the largest; orange with red cheek; firm, juicy with rich flavor; very productive. July.

SUPERB—One of the largest; orange with red cheek; firm, juicy, with rich flavor; very productive. August.

PERSIMMONS

A native of the Southern states, but will thrive and ripen its fruit as far north as the Great Lakes. The tree reaches a height of 20 to 30 feet. The fruit is not large, 1/2 to 1 inch in diameter, and must be fully ripe to become edible. A valuable ornamental tree. Will thrive on the poorest soil. A great change is wrought in the fruit of the tree by the early frosts. Under their influence it becomes sweet, high-flavored, rich

and racy. Long after the leaves have fallen the branches are so heavily laden with plum-like fruits that the tree seems all aglow with the saffron pink tint of the fruit that is very ornamental.

Grapes

THE history of the grape is almost as old as that of man. Vineyards were extensively planted before orchards or other collections of fruit trees were at all common, and today,

it is one of the most highly appreciated fruits. In its flavor it is hardly surpassed by any other fruit in delicacy and richness, and few or none are more beautiful in the dessert. Any person having a plot of ground ever so small, either in the country or city, can find room for one-half to one dozen grape vines. They can be trained up the side of any building or over a garden fence; but the best and cheapest way to grow them in small or large quantities is on the wire trellis.

Work the ground deep and plant a little deeper than they were in nursery. Make rows eight feet apart and six to eight feet in the rows. Some of them, the tender varieties, would be benefited by laying the vines flat on the ground during the winter, with a light covering of earth or litter.

Care should be taken to prune thoroughly each year; no more bearing canes should be left than the roots can sustain in a vigorous growth of new shoots. In a commercial way no fruit crop shows greater returns on the investment. On all markets grapes are very popular and command good prices. They should be planted more generally everywhere.

CONCORD—Bunches large, berries large, round, skin thick and covered with bloom; flesh juicy, sweet. Very hardy, vigorous and productive, at present the most popular of all our native sorts.

AGAWAM—Large, round, early and of great vigor of growth, rich, high, peculiar aromatic flavor, much subjected to disease and too highly flavored, where all its aroma is developed, to be desirable. Red.

Concord

MOORE'S EARLY—A large, black grape of the Concord type, the entire crop ripening before the Concord; bunch medium; berries large with blue bloom; flesh pulpy, of medium quality. Vine hardy, moderately productive, better as it attains age. Planted extensively as a market sort.

CAMPBELL'S EARLY — The king of grapes. The best all around grape on the market. A very strong, hardy vine, with perfect, self-fertilizing blossoms, always setting its fruit well and bearing abundantly. Clusters very large, berries round and of great size, very sweet and rich. The seeds separate easily from the pulp. Ripens first of August, but can be kept until December in cold storage; color black, with a light purple bloom.

ELVIRA (White)—Bunch medium, shouldered and very compact; berry medium, pale green with yellow shade, sweet, tender and free from foxiness; in the West it is grown as wine grape.

BRIGHTON—A cross between the Concord and the Diana Hamburg. Bunches large, berries of medium size; flesh sweet, tender, and of the highest quality; ripens early. Red.

NIAGARA—A magnificent white grape and very valuable for both garden and vineyard; a rank grower and very productive of beautiful bunches of the largest size; berries large, with tough skin; quality good; ripens with the Concord.

WORDEN—This variety is a seedling of Concord which it greatly resembles in appearance and flavor, but the berries are larger, the fruit is better flavored and ripens several days earlier. Black.

MOORE'S DIAMOND—White. A seedling of Concord, partaking of all its good qualities. Of a beautiful greenish color, without any of the yellow spots so common on white grapes. Berries are large, sweet, and of as good quality as some of the more delicate varieties. It is as hardy as the Concord, a profuse bearer and in all one of the best of the newer sorts. Ripens early, a few days before Concord. Very hardy. I recommend this grape for Nebraska and Kansas; does well here.

LUCILE—A beautiful large red grape, which yields as much as Concord; the very

Lucile

best quality, as hardy as any grape listed, except the Beta. A very strong, robust grower; ripens its fruit early. Vine is healthy and free from disease; never drops its berries.

BETA—A small to medium sized black grape, quite acid, but of good quality and fine flavor. Very early, prolific and healthy. It is valuable chiefly for its hardiness. It is hardy without protection far into Minnesota and on this account it is especially valuable for arbors where the large varieties are a little too tender. They are fine for jelly, better than other varieties and make excellent grape juice. The Beta and Dakota grapes are really the best plants to cover arbors or trellises.

Gooseberries

Poorman's Sweet

ing, not subject to mildew. Fruit of medium size, smooth, pale red, tender and of good quality.

CARRIE—A variety for Minnesota and claimed to possess "more valuable points of excellence than any other gooseberry" because "it is the most productive, the most salable, the most profitable, the hardiest, the healthiest, the freest from mildew, the earliest bearer." Fine for the North. Of a bright maroon color and of excellent quality. Most valuable gooseberry for jams, jellies and canning.

PEARL—A very desirable American variety. Very hardy, entirely free from mildew, superior in size and quality, and more productive than Downing. We take pleasure in recommending it for small or extensive planting as one of the best berries of recent introduction. The large berries are pale green and of the finest quality, and valuable for home or market.

RED JACKET (Josselyn)—This American seedling has been widely planted in recent years, and is highly recommended by all growers. Bush is very hardy; clean, healthy foliage and entirely free from mildew. Fruit large, smooth, pale red, and of first class flavor and quality. It is considered the best fruited gooseberry in cultivation.

DOWNING—A well known American sort, which has given the best results everywhere; large and handsome, pale green berry; of splendid quality for dessert and cooking. Bush vigorous, a strong upright grower and exceedingly productive. An excellent sort for family use and suitable for market. This variety is seldom affected by mildew.

POORMAN'S—It is so called from the fact that when ripe it is perfectly sweet, like a sweet cherry, and requires little, if any, su-

be larger and more plentiful. Plant in rows four to six feet apart and four feet apart in the rows. Gooseberries should be planted in every garden, no matter how small; they are hardy, rugged and easily grown, and the fruit is sought for by every housewife for culinary purposes and sells well in all markets. We gathered and sold in 1917, 130 bushels of Gooseberries.

HOUGHTON—An enormously productive and always reliable old variety. Of vigorous growth, slender and spread-

gar for culinary purposes. This most remarkable gooseberry is a seedling from Houghton and is as hardy as its parent. It is a strong grower, the bushes being inclined to grow in tree shape. It is red when ripe, very large and has a shape and flavor like a plum.

Oregon Champion

OREGON CHAMPION—Berries very large, brownish red color, very sweet and fine for table use and pies. Bush a strong grower, healthy and not very thorny and a very prolific bearer. I recommend this variety to my customers, especially for large plantations. It will bring good returns. Best berry for the market.

Currants

A COOL, moist location is best for this fruit, and for this reason it succeeds admirably when planted by a stone wall or fence, being benefited by partial shade. Plant in rows four feet apart, and the plants three feet apart in the rows. They should be pruned each year, and all dead wood cut from them. Keep them thinned out so that air can freely pass through them. Currant worms can be destroyed by the use of hellebore. Dissolve an ounce in three gallons of water, and apply with a syringe or small sprinkling can. This can be done with a very little expense if performed at the right time.

W H I T E GRAPE — The best white currant. The bunches are large, and full, berries large, sweet, of a beautiful translucent white and of mild, superior quality; very fine for table. Bush grows quite vigorous somewhat spreading, and produces large crops. A dependable and very popular variety.

White Grape Currant

PERFECTION—This grand new fruit was originated by Charles G. Hooker, of New York, by crossing the Fays Prolific with the White Grape Currant, with the view of combining the large size and color of the Fay with the good quality and productiveness of the White Grape. The color is a bright red; size as large or larger than Fay, the clusters averaging longer. The Perfection has a long stem, making it easy to pick without crushing any of the berries. It is a great bearer. The berries are of rich, mild flavor, sub-acid, plenty of pulp with few seeds. Less acid and of better quality than any other currant in cultivation. In my garden the Perfection is the best bearer with largest berries; the sweetest currant I ever tasted, and the easiest to pick. Anybody can pick a basket of Perfection as fast or faster than cherries.

VICTORIA—Red. Bunches long; berries large, of a bright red color and excellent quality. A strong grower, extremely hardy. The best late variety.

CHERRY—Red. Bunches very large, berries sometimes measuring one-half inch in diameter. A strong grower and must have good cultivation to do well.

Blackberries

IN field culture plant in rows eight feet apart and three feet in rows. In garden culture plant rows five feet and three feet distant in rows. The pruning should be governed by the growth of cane and should be severe. Pinch back the canes in summer when three feet high, causing them to throw out laterals. Cultivate for first season to get plants well established, then the ground between the rows may be mulched enough to keep down the weeds.

Erie and Early Harvest	\$0.06	\$0.50	\$ 4.00
Snyder and Stone's Hardy06	.50	4.00
Oregon Evergreen15	1.20	10.00

By parcel post, prepaid, add 2 cents for each vine ordered.

SNYDER—Very popular for North and Northwest on account of the extreme hardiness. Wonderfully productive, size medium, fruit juicy and sweet, without the hard core of many sorts; cane remarkably strong and thrifty; more largely planted than any other of the ironclad varieties. We have a heavy demand for them every year. Season early.

STONE'S HARDY—Upright grower; very hardy; the berry is black and glossy when ripe, and has a delicious flavor. It commences to ripen its fruit about five days earlier than Snyder, and continues bearing ten days longer.

EARLY HARVEST—One of the earliest blackberries in cultivation, a compact dwarf grower, fruit rather small and of good quality, heavy bearer; its extreme earliness makes it a very profitable variety. Bloom stands the spring frosts best of all.

OREGON EVERGREEN—The Oregon Evergreen blackberry is one of the good things that have come to stay with us and

will prove a great boon to all lovers of the wholesome and luscious fruit. Everyone who has a dooryard or a piece of ground, however small, can now have plenty of the sweetest and best blackberries at little trouble or cost, as this valuable new variety will thrive and bear immense crops of the most luscious fruit wherever it can get a foothold in the soil, and any kind of trellis, arbor or support for the magnificent, grape-like vines to run over. The Oregon Evergreen blackberry differs from all other blackberries in form of its foliage and manner of growth. The canes do not die in winter like other blackberries, but continue to grow and bear year after year like a grapevine. The foliage somewhat resembles that of the fern and forms a remarkably handsome covering for arbors. The berries are borne in clusters of four or five on a stem, are good sized, fine flavored, sweet and delicious, either to eat from the hand, canning or cooking. They are immensely productive. No other blackberry will bear such heavy crops and continue fruiting so long in the season.

Raspberries

RASPBERRIES should be set in the spring, plants three and a half feet apart in the row and rows four feet apart. Set plants three to four inches deep, depending on the soil (in heavy clay do not set as deep as in light soil); roots spread out and dirt pressed firmly among them. Give thorough shallow cultivation until the last of July, or if you prefer mulch in with coarse manure or something of that kind, and keep the ground well stirred, between the rows. When the new canes are about two feet high, pinch off the top; this will make the plant throw out side branches and do away with the necessity of tying up. In the spring cut these side branches back to 16 or 18 inches in length. Four or five good canes in a hill are enough. Cut out old canes as soon as through fruiting and burn them.

GREGG—Leading Black Cap and a popular market sort; canes of strong, vigorous growth, and under good culture very productive; berries are large, covered with heavy bloom, firm, meaty and of fine flavor. It requires a good strong soil to produce best results; it is not entirely hardy, but suffers during unusually severe winters; it is by far the best Black Cap and the largest of any.

CUMBERLAND—A mammoth mid-season Black Cap that loads its stock canes with handsome fruit. The great glossy berries out-sell all others of their season, and are firm enough to ship well. Excellent quality. Many berries are seven-eighths of an inch in diameter. Hardiness, productiveness, size and quality make it desirable. Ripens a few days before the Gregg.

Cumberland

St. Regis

CUTHBERT, OR QUEEN OF THE MARKET—A remarkably strong, hardy variety, standing the northern winters and southern summers equal to any. Berries very large, conical, rich, crimson; flavor is sweet, rich and luscious.

CARDINAL (Red)—The most remarkable plant of cane growth yet introduced; canes not injured by temperature of 26 degrees below zero; color dark red, almost purple; very productive; berries large and round. The best of its kind.

ST. REGIS EVERBEARING RASPBERRY—An excellent novelty. Raspberries for four months! That's what you get when you plant the St. Regis, the new everbearing variety. Moreover, they are not only raspberries, but raspberries of the highest grade—in size, in brilliant crimson color, in firmness, in flavor. The variety has been aptly termed "the early till late" variety; for it is the first red raspberry to give ripe fruit, while it continues to produce berries without intermission until late October. The St. Regis is of pure American blood, and of ironclad hardihood. In addition to the brightest crimson color, and large size of the fruit, it is so firm and rich in sugar that it will stand shipping two hundred miles, arriving at market in first class order; and it can readily be kept in perfect condition for

several days after being gathered. Unlike any other raspberry, the St. Regis yields a crop of fruit the season it is planted. Plants of it planted in early April gave ripe berries on June 20th of the same year. For four weeks thereafter the berries were large and beautiful, firm and full flavored to the very last.

TURNER—A beautiful red berry of fine size and excellent quality. One of the hardest and most productive varieties known.

HIMALAYA BERRY

This berry is a new arrival from the North Slope of the Himalaya Mountains, 6,000 feet above the sea level. It is black, but not a blackberry. For many centuries the natives of that country have been mak-

Himalaya

ing wine of it, and only the invasion by British troops has brought this delightfully luscious fruit to our civilization. The vine is a vigorous grower, making a growth of 20 to 30 feet in one year, which can be trained on a fence or arbor similar to grape vines. The enormous clusters of large sized berries ripen all summer, making the Himalaya the most productive of any variety known. They have no core and the flavor is sweet, of un-

usual richness, and when ripe will literally melt in your mouth. For pies, jellies and desserts the Himalaya berry is a perfect success, being ahead of any similar fruit. The severity of their native climate has made the berries hardy and both plant and fruit will stand extremes of heat and cold better than any other variety.

15c each; 8 for \$1.00; \$10 per hundred. By parcel post, prepaid, add 2 cents for each vine ordered.

LOGANBERRY

Originated in California in 1884. Supposed to be a cross between a red raspberry and a blackberry. In California for several years it has been grown in quantity for market, and has been well tested in eastern states. Vine is strong grower, spreading like Dewberry, free from disease; canes large, exceedingly prolific; ripens very early. Fruit is of size of large blackberry, same form and shape; color bright red, seeds small, flavor combination of blackberry and raspberry; mild, pleasant, vinous, excellent.

Price—25 cents each; \$2.25 per 10; \$20.00 per 100. By parcel post, prepaid, add 2 cents for each vine ordered.

DEWBERRIES

BARTEL'S MAMMOTH—Fruit very large, luscious and handsome; perfectly hardy, a strong grower and enormously productive; a superb and profitable market fruit. The vines should be allowed to lie on the ground in winter and staked up early in the spring.

LUCRETIA—This is the leading and most popular Dewberry yet discovered; it succeeds everywhere and is not particular about the kind of soil. Berries very large, black and fine flavor. It should not be picked oftener than twice a week, when it is very

sweet and rich. It ripens with the last strawberries.

Price—8 cents each; 75 cents for \$10.00; \$6.00 for 100. By parcel post, prepaid, add 2 cents for each vine ordered.

AUSTIN'S THORNLESS—A new variety just introduced, entirely without thorns, which makes it much easier to pick than the common sorts; it is a good grower, hardy and fruit is of fine quality and should be planted in every garden.

Price—20 cents each; \$1.75 for 10; \$15.00 for 100. By parcel post, prepaid, add 2 cents for each vine ordered.

Austin's Thornless

BUFFALO BERRY

The Buffalo Berry belongs to the Olive family of trees. It grows in bush form and sometimes attains a height of ten feet; its leaves are of bright silvery color, and with its load of red fruit, makes a nice

BERRY.

shrub. It is perfectly hardy, and bears immense crops of fruit, which is very good for tarts, jellies, pies and preserves.

It is sometimes called the winter currant from the fact that the fruit remains on until January.

Price—2-foot trees, 35 cents each, 3 for \$1.00. By parcel post, prepaid, add 4 cents for each vine ordered.

DWARF SERVICE OR JUNE BERRY

Grows four to six feet high, bunches out from the ground like currants, resembles the common Service or June berry in leaf and fruit, but the fruit is larger and in color almost black; commencing to bear the second year after transplanting and bears profusely.

No farm or garden should be without this most excellent dessert fruit.

2 to 3 ft., 30c each; \$2.50 per 10. Mailing price, 35c each; \$3.00 per 10.

Strawberries

THE ground should be worked ten or fifteen inches deep and be properly enriched as for any garden crop. Drainage is necessary in very wet soil. For family use plant fifteen to eighteen inches apart, each way, and after a few strong plants have been set from runners, then pinch off all runners as fast as they appear. Keep the ground free from weeds and frequently stirred with a hoe or fork. Plants treated in this manner will produce more crowns and therefore double the amount of well developed fruit than when runners are left to grow.

When the winters are severe, it is well to give the ground a light covering with coarse straw or litter. The covering should not be placed on until the ground is frozen. Fatal errors are made by putting on too much and too early. If coarse straw is used, it may be left on until the plants have done fruiting; taking care to open it up around the plants early in the spring, so as to give them plenty of sunlight and air.

Prices on Senator Dunlap, Gibson and Aroma Strawberry, \$1.00 per 100; \$7.50 per 1000. Mailing price, \$1.15 per 100; \$8.50 per 1000.

Price of Cooper Strawberry, \$1.50 per 100; \$10.00 per 1000. Mailing price, \$1.65 per 100; \$11.00 per 1000.

Cooper

SENATOR DUNLAP (Per)—A well tested, wonderfully productive variety, one of the safe sorts to plant everywhere and sure to take a high place among the prominent standard sorts. Plant resembles Warfield, rampant runner, should be restricted in its production of plants; fully equal to Crescent and Warfield in its ability to succeed under all circumstances. Fruit good size, regular form, beautiful bright red, glossy, firm, splendid keeper and shipper; excellent

quality. One of the best for canning. Ripens early and continues a long time.

GIBSON (Perfect)—Without doubt this is one of our best berries. The plant growth is very good and the plant is larger than the Dunlap. It is wonderfully prolific and the berry is excellent for market, of bright color and holds up well. The plant is a thrifty grower and all that can be desired.

COOPER—This variety has had a wonderful sale during the past two years and it seems to merit the confidence placed in it. Cooper is probably the largest strawberry grown and it is also a heavy cropper, so the amount of fruit produced is enormous. It is a mid-season, staminate variety. The fruit is of a beautiful bright red color and of excellent quality. On account of its large size and beautiful appearance it sells at a premium over most other sorts and is especially recommended for supplying home markets.

AROMA (Per)—Plants large, very vigorous and perfectly healthy. Makes plants just right for a good fruiting row. The blossom is rich in pollen, a good fertilizer for Sample, Bubach and Enormous. Fruit large to very large, roundish, conical, smooth and perfect in form, of a beautiful bright glossy red in color, very firm, and of excellent quality. Will give splendid results on any soil that will grow a good crop of corn or potatoes. It is nearly as late as Gandy, of long season. Three times as productive and a sure cropper every year.

EVERBEARING STRAWBERRIES

Strawberries that yield fruit continually from May until frost have been known for a long time. We have been testing the different varieties of everbearers for several years on our own grounds and offer to our patrons the best. The varieties we offer have given us fruit continuously from June until November in liberal quantities, except during continued dry periods.

Prices on Progressive and Superb, 25 for 35c; \$1.25 per 100; \$10.00 per 1000. Mailing price, 25 for 50 cents; \$1.50 per 100; \$11.00 per 1000.

Price on Champion Strawberry, 25 for 50 cents; \$1.50 per 100; \$12.00 per 1000. Mailing price, 25 for 75 cents; \$2.00 per 100; \$13.00 per 1000.

PROGRESSIVE—This popular Ever-bearing variety is so well known that we will give only a very short description. In manner of plant growth Progressive closely resembles Senator Dunlap and also has the productive ability of that grand old variety. The plants are medium in size, foliage healthy, very deep rooted which enables it to produce its big load of berries during severe droughts. Progressive commences to bear three months after the plants are set and will continue all summer and fall. The berries are medium sized, beautiful rich red color, flavor sweet and delicious, unsurpassed as a canning or table berry. We have a fine stock of genuine Progressive.

Progressive

SUPERB (Per.)—This variety makes large, beautiful, vigorous and thrifty plants and just the right amount for a good fruiting row. Fruit is large to very large, of a beautiful crimson color, running very even for size and shape. In fact, a crate of them looks like each berry had been run in the same mold. The berry is firm, and of good quality. This variety is preferred by many growers on account of its large size, even shape and good quality. The Superb will command a fancy price in any market, from the first picking to the last, and you will make no mistake in ordering this variety.

CHAMPION—This remarkable berry should have space in every garden in America, as it is by far the best fall bearing strawberry ever introduced. It prolongs the season of

this most delightful of all fruits—strawberries—from the one short month of June to cover the entire summer and fall seasons.

When you plant Champion you are certain of success because three months after planting every mother plant and many runner plants will commence bearing and will continue all summer and fall.

Champion

ELDERBERRIES

A well known bush which bears a fine fruit for pies or wine.

Price—15 cents each; 10 for \$1.00. By parcel post, 20 cents each.

RUSSIAN MULBERRY

This tree has been planted very extensively in the western states for the past fifteen years, and we know of no other tree that will stand as much drought and neglect and yet make a good growth each year.

It makes a good shade tree, holding its leaves late into the fall; and for a hedge, without thorns, it has no superior. Trees commence to bear at two years old; fruit resembles the blackberry and will ripen from July 1st to September.

ASPARAGUS

To prepare a bed for planting, the soil should be dug deeply and well mixed together with well rotted manure or compost. Plant in rows two feet apart. In the rows the plants should not exceed a foot apart, and planted about four inches deep. Cover on approach of winter with manure, and fork the bed over lightly in the spring.

Price—3 cents each; 10 plants, 25 cents; 100 plants, \$2.00. Mailing price, 10 plants for 35 cents.

Linnaeus

CONOVER'S COLOSSAL—A mammoth variety of vigorous growth, sending up from fifteen to twenty sprouts each year, from one to two inches in diameter; color deep green, and crown very close.

PALMETTO — It is earlier, a better yield, more even and regular in its growth and quality equal to the old favorite, Conover's Colossal.

Conover's Colossal

RHUBARB OR PIE PLANT

This deserves to be ranked among the best early vegetables in the garden. It affords the earliest material for pies and tarts, continues long in use, and is valuable for canning. Make the border very rich and deep.

Price—10 cents each, 80 cents per 10, \$6.00 per 100. By parcel post, 15 cents each.

LINNAEUS—Large, early, tender and fine; the very best of all.

VICTORIA—The best for market because of its giant growth.

HORSE RADISH

Price—3 cents each; 20 cents per 10; \$1.50 per 100. By parcel post, 5 cents each.

Ornamental Shrubs

THE judicious planting of shrubs adds greatly to the beauty and value of property, and contributes a wealth of pleasure and interest to the home. There are a few principles governing the artistic arrangement of these beautiful ornamentals, that should be more strictly observed. In general, individual specimens should rarely be isolated from the body of the design. Irregular groups or masses arranged against buildings, fences or property lines, or as border plantations, along walks or drives, are much more effective. A good arrangement of shrubs invariably provides wide open stretches near the center of the lawn.

We have reduced our shrub list somewhat, omitting varieties for which, although very desirable in themselves, there is but little demand.

ALMOND—Dwarf, double, rose flowering. A beautiful shrub with small, double, rosy blossoms closely set upon twigs before the leaves appear. 75c each. By mail 80c.

ALTHEA OR ROSE OF SHARON—These are fine shrubs and especially valuable because of their flowering in the fall when nearly all other shrubs are out of blossom. Hardy and easy of cultivation. Red, white and pink. 35c each. By parcel post, 40c each.

BECHTEL'S DOUBLE FLOWERING CRAB—A medium sized hardy ornamental tree of great beauty. When in bloom this tree presents the appearance of being covered with roses, fragrant flowers of immense size, sure to give satisfaction to those who plant this beautiful tree. 75c each. By mail, 85 cents.

BARBERRY THUNBERGII (Japanese Barberry—Berberis)—The Barberry Thunbergii can be planted anywhere. It has nothing to do with Black Rust. You need not be afraid to plant the Thunbergii. Invaluable little shrub that fits in almost every planting. Grows about everywhere, handsome foliage of bright green, oval leaves that turn to most brilliant shades of orange and red in the fall. Slender, graceful branches protected by thorns, are lined with little scarlet berries of great attractiveness from early autumn well into winter. Very valuable for a low hedge.

THE EVERBLOOMING BUTTERFLY BUSH (*Buddleia Variabilis Magnifica*)—

This shrub from a young plant set out either in the spring or fall, will mature to full size the first summer, producing a handsome bush, which the first year often attains a height of four feet. It produces long, graceful stems, which terminate in tapering panicles of beautiful lilac-colored flowers that are of miniature size and borne by the hundreds on a flower head which is frequently 10 inches long. A single plant the first season will throw out as many as 50 flower spikes, which increase greatly in number during the succeeding years. **40c each; by mail, 50 cents.**

BUSH HONEYSUCKLE, PINK TARTARIAN (*Lonicera Tartarica*)—

The best known of all the Bush Honeysuckles, and in our estimation, the finest variety of all. Grows to a height of 8 to 10 feet, with upright, somewhat spreading branches and bright green foliage. The flowers are borne freely in May and June, are of bright pink color, followed by showy, red berries, which ripen in midsummer, and cling to the bush for several weeks. **40 cents each; by mail, 50 cents.**

BUSH HONEYSUCKLE, WHITE TARTARIAN—About the same as the pink, except that the flowers are white. **40 cents each; by mail, 50 cents.**

CALYCANTHUS—Sweet Scented Shrub or Allspice. An interesting shrub having a

Tree Hydrangea

rare and peculiar fragrance of wood and flowers; its blooms are abundant and of peculiar chocolate color. **50 cents each; by mail, 60 cents each.**

DEUTZIA—A small dwarf shrub with spreading branches, usually growing about 3 feet tall. Leaves bright green, 2 to 3 inches long, flowers pure white, in large clusters or panicles. Of vigorous growth, very free flowering and of easy culture. **40 cents each; by mail, 50 cents.**

ELDER, GOLDEN (*Sabucus Aurea*)—A variety with golden yellow foliage. A valuable plant for producing contrast when planted with other shrubs. Grows to a height of about 8 feet, and is of vigorous, spreading habit. The berries, as of the American Elder, are edible, but more red in color. Should have full sun to give best effect. Grows well on all soils and can be pruned into a neat, compact little bush. One of the best golden foliaged shrubs. **45 cents each; by mail, 55 cents.**

FORSYTHIA (Golden Bell)—Few, if any, of the spring flowering hardy shrubs can surpass the splendor and brilliancy of the Forsythia. Both the grace and beauty give them a prominent place in all shrub plantations. Of upright, vigorous growth, foliage rich, dark green and lustrous. Flowers brilliant golden yellow, borne in great profusion early in April before the leaves appear. **2 to 3 feet, 40 cents each; by mail, 50 cents.**

HYDRANGEA—A fine shrub of recent introduction, blooming from July to November. Large, showy panicles of white flowers in the greatest profusion. It is quite hardy and altogether a most admirable shrub for planting singly on the lawn or in the margin of masses. To produce largest flowers it should be pruned severely in the spring and the ground enriched. **2 foot plants, 75 cents each; by mail, 80 cents.**

TREE HYDRANGEA—These are 4 to 5 foot trees with stems and splendid crowns. They are very effective for the lawn or park, or planted along the sidewalks or driveways, about 10 feet apart, they make a most beautiful sight when in full bloom. By planting one or more of these beautiful trees you can show to your neighbors and friends something nice and not commonly seen. **Price, \$1.25 each; 10 for \$11.00. Mailing price, \$1.50 each; 10 for \$12.00.**

LILAC, PERSIAN PURPLE—With glossy green foliage and beautiful, fragrant flowers. A good plant for the lawn and one of the best for a fancy hedge. Hardy everywhere. Flowers purple. **25 cents each; by mail, 35 cents.**

LILAC, PERSIAN WHITE—Same as above, with white flowers. **25 cents each; by mail, 35 cents.**

SPIREA (Van Houttei or Bridal Wreath.)—The best white spirea. The annual growth is long and abundant, and covered in June with a wealth of pure white blossoms. Perfectly hardy. Should be in every collection. **2 to 3 feet, 30 cents each; mailing price, 40 cents. 3 to 4 feet, 40 cents each; mailing price, 50 cents.**

Spirea Van Houttei

SPIREA (Anthony Waterer)—A small, dwarfish grower, 15 to 18 inches high, and covered the entire season with large umbels of deep pink flowers. Quite hardy here and very desirable. 50 cents each; by mail, 60 cents.

SPIREA THUNBERGI (Snow Garland).—A Japanese variety of medium size, with narrow delicate leaves and a profusion of small, white flowers in early summer. One of the best. Leaves narrow, bright green, turning in autumn to brilliant shades of orange and scarlet. 50 cents each; by mail 60 cents.

MOCK ORANGE OR SYRINGA—The Syringa is a large shrub, growing from 6 to 10 feet high. Vigorous habit, very hardy, with large, handsome foliage and beautiful white flowers. Very fragrant. Blooms very freely. Hardy. 30 cents; by mail, 40 cents.

JAPAN SNOWBALL—A rare and exceedingly beautiful species from Japan; flowers pure white, in very large globular heads; 2-foot trees. 75 cents each; by mail, 80c.

SNOWBALL—A well known and favorite bush of large size. Bears balls of pure white flowers in June. We have a bush on our farm on which we counted over 800 blossoms at one time. Hardy everywhere. 40 cents each; by mail, 50 cents.

JAPANESE QUINCE (Red)—Cydonia. Also called Firebush. Very showy and one of the earliest shrubs to bloom, the flowers appearing before the leaves are fully developed. The brilliant scarlet flowers gleaming like red-hot coals. Fruit about two inches in diameter, yellowish green, and of aromatic fragrance. Invaluable for border or garden planting and make beautiful informal or clipped hedges. As a harbinger

of spring the Japanese Quince deserves a prominent place on the lawn, where its bright red flowers can be seen to advantage. Sometimes, when snow may be seen in sheltered corners, this shrub will put forth brilliant flowers, glowing like living coals of fire. Very hardy and easily transplanted, and will thrive in almost any well drained soil. 40 cents each; by mail, 50 cents each.

TAMARIX AFRICANA — Has, like all Tamarix, very pretty feathery leaves of a bright green color, and pink flowers. This variety is not hardy here in Nebraska, freezes to the ground every winter, but always comes up again in the spring and generally gets to be 6 to 8 feet high by fall. 30 cents each; by mail, 35 cents.

WEIGELIA ROSEA—Of Japan origin, producing a mass of flowers from July until fall. Very ornamental flowers, dark rose with light center. Very hardy. 40 cents each; by mail, 45 cents.

WEIGELIA (Eva Rathke)—Brilliant carmine in color, almost continuous bloomer; very fine. 75 cents each; by mail, 80 cents.

Syringa

Plant shrubbery and increase the beauty and value of your property.

Climbing Vines

ARISTOLOCHIA (Dutchman's Pipe)—Derives its name from the peculiar shape of its flowers, which resemble the old-fashioned Dutch pipes. It is one of the most rapid climbers in use. Does best on the north side of houses, where the full force of the noonday sun does not strike it. This is an extremely desirable feature, however, as it fills locations where most other vines are not a success. A very pretty and odd climber. Blooms in June. **80 cents each; by mail, 85 cents each.**

BITTER SWEET (Celastrus Scandens)—A native climber with handsome, glossy foliage and large clusters of beautiful orange-crimson berries, remaining all winter. Very bright in effect and charming for winter house decorations. Very hardy. **30 cents each; by mail, 35 cents.**

BIGNONIA OR TRUMPET FLOWER (Scarlet Radicans)—A splendid climber, vigorous and hardy, with clusters of large trumpet-shaped scarlet flowers in August. **30 cents each; by mail, 40 cents.**

BOSTON IVY—A beautiful, hardy climbing plant. This is one of the finest climbers we have for covering walls, as it clings firmly to the smoothest surface, covering it smoothly with overlapping foliage, giving it the appearance of being shingled with green leaves. The color is a fresh, deep green in summer, changing to the brightest shade of crimson and yellow in the autumn. It is quite hardy and becomes more popular every year. **Strong plants, 60 cents each; by mail, 65 cents.**

CLEMATIS PANICULATA (New Sweet Scented Japan Clematis)—No introduction of recent years has met with such ready sale, and given so perfect satisfaction wherever planted. It grows and thrives anywhere and is a very rapid grower and profuse bloomer. The flowers are pure white. Its extreme hardiness, bright green foliage and delightfully fragrant flowers serve to make this one of the finest hardy climbing plants in cultivation. **Strong 2-year plants, 35c; by mail, 40 cents.**

CLEMATIS (Jackmanii)—A very beautiful blooming variety, with flowers from four to six inches in diameter, of an intense violet purple color, borne successfully in continuous masses on the summer shoots. **80 cents each; by mail, 85 cents.**

HALL'S JAPAN HONEYSUCKLE—This beautiful honeysuckle is almost evergreen, very strong and hardy in growth. The flowers are delightfully fragrant, and blooms profusely from May until frost. A handsome and valuable vine. **15 cents each; by mail, 25 cents.**

HONEYSUCKLE (Monthly Fragrant, or Dutch)—Blooms all summer. Very sweet. Red and yellow flowers. **30 cents each; by mail, 35 cents.**

JAPANESE KUDZU VINE—Jack and the Bean Stalk Vine (Pueraria)—The most remarkable, rapid growing, hardy perennial extant. In rich soil the plant will grow 70 feet in one season. Starts into growth slowly, but after three or four weeks it grows almost beyond belief. Leaves in shape like Lima Beans; dark green, soft and woolly. For porches, arbors, old trees, etc., I know of nothing its equal. Here in Nebraska it freezes to the ground over winter, but always come up again in the spring, and soon it is as large as it was in the fall. **40 cents each; by mail, 50 cents.**

MADERIA VINE—Also called Mignonette Vine and Mexican Vine. A beautiful tuberous rooted climber, with glossy green leaves and handsome racemes of fragrant white flowers. The vines make a rapid growth, and a few plants will cover a trellis or cottage wall in a single season. Will grow anywhere without care. **6 cents each; 12 for 60 cents, postpaid.**

VIRGINIA CREEPER—A luxuriant vine of rapid growth, with large, luxuriant foliage, which in the autumn assumes the most gorgeous magnificent coloring. The blossoms, which are inconspicuous, are succeeded by handsome dark blue berries. The vine is the best calculated to take the place in this country of the celebrated English Ivy, and is really in summer not inferior to it. **15 cents each; by mail, 25 cents.**

WISTARIA (Double Purple)—A rare and

Wistaria

charming variety, with perfect double flowers, deeper in color than the single, and the racemes of remarkable length. The plant is perfectly hardy, resembling the single Wistaria, so well known as one of our best climbing plants. **40 cents each; by mail, 50 cents.**

WISTARIA ALBA—A form of the above, but flowers are pure white, in large droop-

ing racemes. **60 cents each; by mail, 70 cents.**

WISTARIA, Grafted—As a usual thing the Wistaria does not come into blooming until five or 6 years but by grafting them they begin to bloom the second year. We have some of this sort at **75 cents each; by mail, 80 cents.**

Roses

OUR Roses are all very strong two-year-old plants, either grown on their own roots or budded on Manetti, and not to be compared with the puny greenhouse Roses from two-inch pots sent out by some nurserymen.

CLIMBING ROSES

CRIMSON RAMBLER—The famous crimson clustered climber, so extremely effective when grown on pillars and trellises. The plant is a vigorous grower, making shoots 8 to 10 feet in a season. The foliage is large and glossy, the plant looks like a mass of double crimson flowers when in bloom. The panicles are large and remain perfect for several weeks. Perfectly hardy anywhere. **35 cents each; by mail, 40 cents.**

WHITE RAMBLER—Resembles Crimson Rambler in foliage and habit; flowers pure white. **35 cents each; by mail, 40 cents.**

YELLOW RAMBLER—It is related to the Crimson Rambler and, like it, blooms in large trusses. **35 cents each; by mail, 40 cents.**

PRAIRIE QUEEN—A rapid climber; flowers are very large; a bright rosy-red, changing lighter as the flowers open; strong and vigorous. **35 cents each; by mail, 40 cents.**

SEVEN SISTERS—One of the best of the old-fashioned sorts; flowers in clusters and color varies from dark to light red or pink. **35 cents each; by mail, 40 cents.**

EXCELSA (Red Dorothy Perkins)—Intense crimson-scarlet; double flowers in brilliant clusters set in glossy, shining foliage

which never mildews or spots. **35 cents each; by mail, 40 cents.**

MONTHLY BLOOMING ROSES

PAUL NEYRON—Deep rose color, splendid foliage and habit, with large flower. **50 cents each; by mail, 55 cents.**

ULRICH BRUNNER—The flowers are very large, of beautiful form and very double; color, deep rich rose. **50 cents each; by mail 55 cents.**

GENERAL JACQUEMINOT—Brilliant crimson scarlet. Very showy and effective. **50 cents each; by mail, 55 cents.**

AMERICAN BEAUTY—This rose has become as famous as the Marechal Neil. It is a hardy rose of the largest size, having the everblooming qualities of the Tea Rose, with the delicious odor of the Damask or Moss Rose. It is sweetest of all roses. Color a deep, brilliant red, shading to a rich carmine crimson. A valuable rose for the garden or indoor culture, flowering freely during the winter. **70 cents each; by mail, 75c.**

American Beauty

FRAU KARL DRUSCHKI OR WHITE AMERICAN BEAUTY—A pure paper white, free flowering, large size Hybrid Perpetual. It is a remarkably handsome plant, with bright, heavy foliage filled with strong, upright growth. Two-year-old field grown, 70 cents each; by mail, 75 cents.

HARRISON'S YELLOW—A well known favorite, free flowering and beautiful. 50c each; by mail, 55 cents.

"BABY RAMBLER"—A dwarf (bush, not climbing) form of Crimson Rambler, and furthermore everblooming. Will bloom constantly throughout the summer if planted out of doors. Has the same bright crimson color as the Climbing Rambler, and blooms in clusters of 20 to 40 flowers at one time on plants of fair size. Baby Rambler is one of the best red roses for bedding and is going to be just as popular and extensively planted as the climbing form has been. May be grown in pots.

Two-year plants, 50 cents each; by mail, 60 cents.

Memorial

MEMORIAL ROSES

A rose of trailing habit, a very hardy and rapid grower, with a glossy foliage, which remains on until late in the fall. Its flowers are pure white and very fragrant. It is especially adapted to cemetery planting, hence its name; or it may be trained as a screen to hide some unsightly root, stump or rock. 35 cents; by mail, 40 cents.

We list only tried and true varieties of the best Roses, bas-

ed on many years of experience in growing and selling them.

Ornamental and Shade Trees

These trees are too large to go by parcel post.

CAROLINA POPLAR—One of the most rapid growing trees, with large, handsome, glossy, deep green leaves. Succeeds everywhere; especially adapted to cities where it makes unusually fast growth and resists smoke and gas. Pyramidal in form, making a spreading head and dense shade when properly trimmed. It is unexcelled for quick growth and effect; makes a splendid windbreak or screen. It is used in larger numbers for street planting than any other tree.

RUSSIAN OLIVE—A beautiful lawn tree, with spreading top; nearly black shining bark and silvery-white, long, narrow foliage. The small yellow blossoms have a wonderful appearance. The exquisite perfumes are carried long distances in the air. Fine if planted in a group with green leaved trees, among shrubbery, or as a lawn tree. Hardy as far north as Canada. It deserves a place in every park or garden. Should be much more largely planted. Can also be used as a hedge or screen, as it stands pruning or shearing well.

RED BUD, Judas Tree, (Cercis Canadensis)—A very ornamental native tree of medium size, with perfect heart-shaped leaves and hardy even in Canada. Blooms early in the spring, before the leaves appear, covering the branches with small reddish purple flowers. Hardy; does well also on wet land. Grows wild in Kansas, Missouri, Iowa and some parts of Nebraska.

Price—5 to 6 feet, well branched, \$1.00 each; 10 for \$9.00.

PIN OAK, (Quercus Palustris).—An upright, vigorous growing variety, forming a stately, round topped tree, with long, slightly pendulous branches. The dark green, deeply cut foliage turns to brilliant yellow and crimson shades in autumn, forming one of the best of our fall colored trees. Grows faster than other Oak, often making shoots of 2 feet or more in one season. 5 to 6 ft., \$1.50 each; 10 for \$14.00.

LINDEN OR BASSWOOD—A very pretty pyramidal tree with large leaves and fragrant flowers. A valuable tree for street or lawn planting, developing into beautiful specimens. Extensively planted for ornamental purposes and for bee culture. Rapid

growth, not particular as to soil, and perfectly hardy. 5 to 6 feet, \$1.35 each; 10 for \$12.00.

Linden

BLACK WALNUT—A native of Nebraska. Of large size and majestic form, with beautiful foliage. Grows best on low ground, bears very freely. The most valuable of all trees for timber, which enters largely into the manufacturing of furniture and cabinet work and brings the very highest price in the market. Tree is a fairly rapid grower, and also makes a fine shade tree. The large, oily nuts are of fine flavor and marketable at a fair price.

Black walnuts are getting very scarce. Our government has bought up thousands of walnut logs, using them for gun stocks and in the manufacture of aeroplanes. The price of walnut logs is very high now.

	Per 1	Per 10	Per 100

WEeping TREES

These trees are too large to be sent by parcel post.

These trees form objects of great beauty when planted as single specimens on lawns, in the front yard and especially when used for cemetery decorations. Also of great value for covering arbors. Our list embraces the best varieties.

TEA'S WEEPING MULBERRY—We cordially recommend this as one of the thriftiest, hardiest, and most beautiful weeping trees. It transplants easily and is appropriate for both large and small places. The leaves are lustrous, distinctly lobed; the branches slender and willowy, forming a tall, narrow green tent of dense shade. Fine tree. Each, \$2.25.

CAMPERDOWN WEEPING ELM—Its vigorous branches, which have uniform habit, overlap so regularly that a compact, roof-like head is formed. Leaves are large, glossy, dark green. A strong, vigorous grower. One of the best weeping trees. It can be trained

MAPLE, SUGAR OR HARD—A popular American tree of pyramidal form. The foliage is large and handsome, and of rich, pleasing green, turning to orange yellow and red in summer. Its upright habit of growth, dense shade and adaptability to different soils has rendered it one of the most extensively used. Valuable for sugar and timber.

PEONIES

That Herbaceous Peonies are as fine and effective in their way as Rhododendrons or roses is now being generally recognized. They are hardier and more easily cultivated than either of their rivals, and are being used in the same way for bold display of color. Their flowers are very lasting; some of them are finely finished and exquisitely colored. Plant in deep, rich, well prepared soil, covering the buds but an inch or two. Do not expect too much of them the first year. They are a little slow in establishing themselves.

We can furnish red, white and pink, common sorts, strong plants, at 35 cents each; 3 for \$1.00; by mail, 40 cents each.

We also have choice varieties as named below at 50 cents each; by mail, 55 cents.

EDULIS SUPERBA (Lemon)—Very large, bright rose flower; a beautiful early variety.

INDISPENSABLE—Shell pink, showy; a beautiful variety.

DELICATISSIMA—This beautiful flower should be in every garden. Very large; delicate, clear pink, lighter in the center; very fragrant; free blooming. Exceptionally pretty in the bud; a quality flower in every sense. It is unexcelled as a cut flower.

FESTIVA MAXIMA—About the largest and undoubtedly the most popular Peony of them all. High built flowers borne on long, stiff stems. The purest white inner petals slightly tipped carmine. Early.

Peonies

FELIX CROUSSE—30 inches. Large, compact, globular bomb. Large guard petals. Brilliant ruby red, without any shades of violet or purple. Fragrant. Strong grower.

MODEST GUERIN—Brilliant carmine-rose with a high and stiff center full of rosy pink petals.

QUEEN VICTORIA—The broad guard petals are a pretty bluish-white; center slightly edged pink.

CANNAS

One of the most popular of bedding plants with their green and bronze foliage and bright flowers; we grow six of the best varieties. 10 cents each; 1 dozen, \$1.00, for dry bulbs. By parcel post, prepaid, add 2 cents to the price of each

MADAME CROZY—3½ ft. Green foliage; flowers vermilion with gold border.

Cannas

Delicatissima

WINTZER'S COLOSSAL—Bright crimson scarlet; extra large flowers.

The price of the three following varieties is 15 cents each; \$1.25 per dozen. By parcel post, add 2 cents to the price of each bulb.

KING HUMBERT—4 to 5 feet. Giant flowered, orange scarlet, bronze leaf. The flowers are very large and very free blooming. The handsome leathery foliage is of strong habit.

YELLOW KING HUMBERT—Same as above except that the flowers are yellow.

PRAIRIE GOLD—A very fine variety; flowers clear yellow.

GOLDEN GLOW

The most prolific and satisfactory of all yellow-flowering sorts. Grows 5 to 7 feet and blooms from early summer until frost. Flowers are produced on long stems in enormous quantities, and resemble golden-yellow Cactus Dahlias. 20 cents each; by mail, 25 cents each.

Golden Glow

PHLOX

No class of hardy plants is more desirable than the Perennial Phloxes. They will thrive in any position and can be used to advantage in the hardy border, in large groups on the lawn, or planted in front of belts of shrubbery, where, by judicious pinching back and removing faded flowers, a constant succession of bloom may be had until frost.

Assorted colors: 20 cents each; 6 for \$1.00; mailing price, 22 cents each. We cannot select colors.

IRIS

The true "Fleur-de-Lis," the National flower of France. They are perfectly hardy, thrive anywhere, grow and bloom luxuriantly, particularly if plentifully supplied with water. Plants well established produce 50 to 100 spikes of bloom. In beauty the flowers rival the finest of orchids. The plant grows 18 to 24 inches high. Six assorted colors: 10 cents each; 3 for 25 cents, postpaid.

We cannot select colors.

Iris

TUBEROSES

Tuberose

A beautiful wax-like, very sweet-scented, double flower growing on tall stems. Price, 6 for 25 cents, by mail, 7 cents each.

BLEEDING HEART

DICENTRA—Bleeding Heart the popular name of the Dicentra, is derived from the curious heart-shaped blossoms with the drop of blood below; were great favorites in the old gardens. Fine for the border or margins of shrubbery. In the spring these plants bear beautiful heart-shaped flowers of a light red color. The stems grow 18 to 24 inches high, with abundant deeply cut leaves of light green color. 75 cents each; 10 for \$7.00, postpaid.

GLADIOLUS

One of the most attractive summer flowering bulbs. Very ornamental for the lawn. To obtain a succession of bloom there should be several plantings made at intervals of about a week. Set bulbs 6 to 9 inches apart and about 4 inches deep. If the soil is poor see that it is carefully enriched. The flowers are excellent for cutting, and last a week in water, the bulbs opening well. The bulbs should be taken up in the fall before heavy

Gladiolus

freezing weather sets in and allowed to dry off in the sun. Cut off the stem close to the bulb, put in paper bags, and place where they will not freeze. A cold, dry atmosphere is best. We have a fine collection of the large flowering sorts. Dry bulbs, 5 cents each; \$4.00 per 100; mailing price, 6 cents each.

MALLOW MARVELS

Most gorgeous perennial creation of the twentieth century. The plants are perfectly hardy and grow from strong, fleshy roots to a height of 6 to 8 feet in one season. They seem to thrive in almost any soil, having a preference, however, for a moist rather than a dry situation. In the last days of July the blooms appear and continue until late in fall. The huge flowers, some of them measuring over 10 inches in diameter, come in the most gorgeous and brilliant shades. 25 cents each; postpaid.

DAHLIAS

No garden is complete without a show of these brilliant and steady autumn flowers, and nothing gives greater return for so little money and care. We have a fine assortment of the best varieties. Price, 20 cents each; 6 for \$1.00, postpaid.

Dahlias

GYPSOPHILA

Also called Angel's Breath and Baby's Breath. Thrives everywhere and furnishes the loveliest material for all kinds of bouquets. Price, 20 cents each; 10 for \$1.80, postpaid.

CALADIUM

FLEPHANT'S EAR—A splendid tropical appearing plant usually growing 4 to 5 feet high. Very showy leaves, often growing 3 feet long. Of easy culture. They are used to a great extent for large beds, together with Cannas, also as single specimens or as groups on the lawn. For obtaining tropical effects in lawn and garden, this beautiful plant takes a prominent place. Will grow in any soil, but to get the best results, they should have plenty of water and good, rich soil. When at its best, stands 6 to 7 feet high, with bright green leaves, 3 to 4 feet long and 2½ feet wide. Bulbs, 30 cents each; 3 for 75 cents, postpaid.

HOLLYHOCKS

Hollyhocks

Among the very finest of old hardy garden plants, the Hollyhock still holds a proud place and may be termed one of the great flowers of July. It has the widest range of colors among tall garden plants. Flowers are very showy, produced in great abundance on long, towering spikes. Height 6 to 8 feet. Blooming period June to August.

Price, postpaid, 15 cents each; per dozen, \$1.50.

GAILLARDIA GRANDIFLORA

(Blanket Flower)

Gaillardia

Among the everblooming hardy plants there is none more showy or ornamental than this. Flowers borne in prodigal profusion from June to frost; useful for cut flowers. They are of gorgeous coloring, dark red-brown in center with bands of crimson, orange and vermilion, meriting the popular title of "Aurora Flower." Height 2 ft. I find this to be one of the best perennials in my garden. It is very hardy, needs little care, blooms continuously all summer, has long stems and therefore can be used in almost any bouquet. Those who wish flowers and have not much time to take care of them, should plant Gaillardia.

Price, postpaid, 15 cents each; per dozen, \$1.50.

DELPHINIUM

(Larkspur)

One of the finest sights of modern gardens is a fine collection of blooming Larkspurs. They give us the greatest abundance of flowers and utmost variety in tints and shades of blue during June and July. The Delphiniums make good border backgrounds. Although plants thrive in any good garden soil, a deep, rich, loamy one, with sunny exposure is best.

Price postpaid, 15 cents each; 10 for \$1.25.

CANTERBURY BELLS

(Campanula)

An old time favorite, growing 2 to 3 feet high and bearing in great profusion very pretty bell-shaped flowers. The Campanulas give to our gardens exceedingly pretty flowers for almost every location, moist or dry, sunny or shaded, and the flowers are produced even in summer drought. Valued for cut flowers. Price, postpaid, 15 cents each; 10 for \$1.25.

DIGITALIS OR FOXGLOVE

An old fashioned flower that should be planted in quantity. Succeeds under all conditions, furnishes a grand display during July and August. The flowers are very showy, thimble shaped and are borne close together on stalks, 3 to 4 feet high. For backgrounds and contrast among the shrubbery, it is a very fine plant. Grows well in

a partly shaded location. Price postpaid, 15 cents each; 10 for \$1.25.

AQUILEGIA

(Columbine)

The Columbines have established a place in all old-fashioned gardens. Their curious forms and many pleasing shades of color and the readiness with which they adapt themselves to all localities, have made them prime favorites. Price, postpaid, 15 cents each; 10 for \$1.25.

SEED POTATOES

We are now prepared to furnish our customers with first-class seed potatoes and would be pleased to receive a trial order from you. The

necessity for changing seed often is universally admitted by all well posted growers, especially when the best seed can be had, at so little additional outlay. Owing to the perishable nature of seed potatoes and the unsettled condition of all markets, prices are made subject to market changes, and confirmation of order on receipt of same.

All of our seed potatoes were grown in the Red River Valley in Minnesota and were shipped to us in October, before danger of frost, so you may be sure the potatoes are in good condition to grow.

Early Ohio Potato

EXTRA EARLY OHIO—(Red River Grown)

This is without a doubt the most popular early potato in the country. We have more calls for it than any other variety. Everyone knows what it is and that it can be relied upon for an early market variety in almost any locality. They are smooth, clean and free from prongs and scabs. They grow stronger and more vigorous, maturing the crop in shorter time and yielding much more than homegrown seed, so there is the utmost satisfaction in planting them. Potato growers in the South will have their crop ready for market from ten days to two weeks earlier if our Red River Valley Ohios

are planted. This variety is sometimes sold under the name of Early Six Weeks Potato. It will pay you to change your seed this year and plant a few acres of our selected stock of Ohios.

Price: 3 lbs. postpaid, 30c; by express or freight, pk., 50c; bu., \$1.75; 3 bu., or bbl., \$4.50. We do not prepay express or freight on potatoes.

RED RIVER BLISS EXTRA EARLY TRIUMPH—This is considered the earliest of all potatoes and is the leading early potato of all southern states. We are all familiar with it as sold at the grocery stores, when the

first NEW POTATOES are shipped in. It is at least a week earlier than the early Rose and the Early Ohio. The tubers are of a very handsome appearance, being almost round and most uniform in shape and size, with slightly depressed eyes, which are mostly on the seed end. The skin is of a pretty light red color, while the flesh is of the purest white, both raw and when cooked. Its beautiful appearance, wonderful productiveness and superior table qualities make this potato a favorite for the early market, wherever introduced. It produces at least from 12 to 15 tubers per hill, all of marketable size.

Price: 3 lbs., postpaid, 30c; by express or freight, pk. 50c; bu. \$1.75; 3 bu. or bbl. \$4.50.

RED RIVER IRISH COBBLER—An excellent extra early variety, maturing good sized tubers 7 weeks from the time of planting. It has also the remarkable characteristic of producing very few, if any small potatoes, all the tubers being of marketable size. The vines are short, of upright growth, so that the hills, may be only a short distance apart. Skin is clean and smooth, flesh is pure white and of excellent quality, always cooking dry and mealy. The Irish Cobbler enjoys the distinction of being the only variety that is planted more extensive-

ly on Long Island (New York) than any other potato.

Price—3 lbs. postpaid, 40c; by express or freight; pk. 60c; bu. \$2.00; 3 bu. or bbl., \$5.25. We do not prepay express or freight on potatoes.

SEED SWEET POTATOES

Price—3 lbs., postpaid, 45c; by express or freight, 4 cents per lb.; 100 lbs., \$3.00. We do not pay freight or express on Sweet Potatoes.

Varieties. Yellow Jersey and Nansemond.

ANGORA CATS

We are breeding long-haired Angora Cats. These make the finest pets and are also good mousers. Colors are mostly white, some mixed with buff. Prices run from \$5.00 to \$10.00 each. If you are interested write us for prices on kittens we have on hand.

POULTRY

S. C. RHODE ISLAND REDS

For a number of years we have been breeding and showing this variety and have some extra good stock at present, this is the most popular breed of chickens.

Price of eggs from mated pens—\$3.00 per 15 eggs. We have a large flock on farm range, eggs 50 for \$4.00; 100 for \$7.50.

S. C. WHITE LEGHORNS

Extra fancy laying strains. 50 eggs for \$3.00, 100 eggs for \$5.00.

S. C. White Leghorns

PLANTS

In early spring of each year we grow large quantities of vegetable plants, such as Sweet Potato, Tomato, Cabbage, Peppers, Egg Plant. We ship either by mail postpaid or express, when sent by express the customer pays the expressage. It is not advisable to ship vegetable plants west of the Rocky Mountains or east of the Mississippi on account of their perishable nature.

TREE PROTECTORS

Price—2½ cents each; \$2.00 per 100

Mailing price, 3 cents each.

Same are made of veneer and are the best and easiest applied of anything ever used. Two men can wrap 1,000 trees a day. They are 18 to 24 inches long, 9 to 12 inches wide and one-twelfth inch thick, and are fastened with a small wire around the center, and will last from three to five years.

Will protect your trees from rabbits, mice and borers; will also protect the stems from sunscald and can be left on all summer and will not injure the tree. They are furnished green, tied in bundles of 100 each, and are ready for use. Soak in water before applying.
